

Ares Dynamic Credit Allocation Fund, Inc. (NYSE: ARDC)

**Annual Report
December 31, 2019**

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund or your financial intermediary electronically at any time by (i) calling 877-855-3434 toll-free or by sending an e-mail request to Ares Dynamic Credit Allocation Fund, Inc. Investor Relations Department at ARDCInvestorRelations@aresmgmt.com, if you invest directly with the Fund, or (ii) contacting your financial intermediary (such as a broker-dealer or bank), if you invest through your financial intermediary. You may elect to receive all future reports in paper free of charge. You can inform the Fund or your financial intermediary that you wish to continue receiving paper copies of your shareholder reports by (i) calling 877-855-3434 toll-free or by sending an e-mail request to Ares Dynamic Credit Allocation Fund, Inc. Investor Relations Department at ARDCInvestorRelations@aresmgmt.com, if you invest directly with the Fund, or (ii) contacting your financial intermediary. Your election to receive reports in paper will apply to all funds held in your account, if you invest through your financial intermediary, or all funds held with the fund complex if you invest directly with the Fund.

Letter to Shareholders

As of December 31, 2019 (Unaudited) covering the partial reporting period from November 1, 2019 to December 31, 2019

Dear Shareholders,

We thank you for your support of the Ares Dynamic Credit Allocation Fund, Inc. (“ARDC” or the “Fund”) and recognize the trust and confidence that you have demonstrated in Ares through your investment in ARDC.

Economic Conditions and Leveraged Finance Market Update

Financial markets continued to rally in November and December 2019 fueled by an initial resolution in U.S.-China trade relations and accommodative central bank policy. The Federal Reserve (the “Fed”) kept rates unchanged and affirmed a positive overall economic outlook despite geopolitical tensions and uncertainties surrounding the 2020 elections. U.S. economic data indicated a stable end to 2019 as the unemployment rate remained at a multi-decade low,¹ inflation risks remained muted,² and expectations of 2020 GDP remained fairly consistent with the last six months’ GDP of 2019.³ Although the U.S. manufacturing index contracted for the fifth straight month in December, the U.S. services sector, which comprises a majority of U.S. economic activity, continued to expand.⁴

With respect to corporate credit, markets were bifurcated for most of 2019 as demand skewed toward higher quality assets. However, as a result of supportive macroeconomic and geopolitical conditions, the high yield and leveraged loan markets experienced a risk rally in December, and lower rated CCC securities outperformed BB rated securities, making up for much of the weakness earlier in the year.⁵ Reflecting positive investor sentiment, nearly half of the leveraged loan market and over 80% of the high yield market ended the calendar year trading at a premium to par (after starting 2019 close to 0% and under 20%, respectively).⁵ The fundamental credit environment continues to be resilient with both the high yield and loan default rates of 2.63% and 1.64%, respectively, remaining below their long-term averages (3.44% and 3.01%).⁶ Against this backdrop, the Credit Suisse Leveraged Loan Index (“CSLLI”) posted 2.17% in returns during the last two months of 2019 with December as the strongest month since January 2019. In a notable reversal, the energy sector led industry performance as the ICE BofA High Yield Master II Index (“H0A0”) posted 2.37% in returns during the last two months of the calendar year. In this environment, we remain acutely focused on credit selection and on finding opportunities to take advantage of oversold conditions to drive attractive-risk adjusted returns for our investors.

In the CLO market, new issue volumes remained healthy with \$21.9 billion pricing during the last two months of 2019. For the full calendar year, global issuance volumes recorded \$151.7 billion across 318 deals, but were approximately 6% lower than the \$161.2 billion recorded across 307 deals in 2018.⁷ While foreign AAA buyers have been less active in 2019 due to increased regulatory scrutiny, strong demand from bank treasury groups has filled the void. Further down the capital stack, spreads on lower rated tranches tightened,⁸ driven by the attractive relative value offered by CLOs vs. similarly rated corporate securities. Despite the tightening, manager tiering continues to be meaningful, and new issue creation is very challenging for less seasoned and less liquid managers, in our view. As a result, the volume of CLO resets and refinancings, which lack the degree of economic concessions of new issue deals, has remained muted throughout the year. In this environment, we maintain our heightened focus on credit quality, documentation, cleaner transaction structures and downgrade risk protections.

Looking ahead, we expect 2020 to present bouts of episodic market volatility, particularly given the geopolitical landscape and the uncertainty surrounding the U.S. Presidential election. Consequently, we believe the opportunities for bottom-up, fundamental active managers like Ares will be robust, and we intend to remain disciplined credit pickers so that we are positioned to take advantage of these opportunities to find value.

Portfolio Performance and Positioning

For the two month period ending December 31, 2019, ARDC generated 4.99% in returns based on Net Asset Value (“NAV”) and 7.53% in stock-based total returns, which compares to 2.17% for the CSLLI and 2.37% for the H0A0.⁹ It is important to note that given its flexible mandate and focus on senior secured bank loans, high yield bonds and CLOs, we believe there is no single established benchmark that reasonably compares to ARDC.

ARDC’s strong performance during the two months ended December 31, 2019 was primarily driven by the recovery in CLO valuations and was also supported by the rally in leveraged loans and high yield bonds. ARDC’s CLO investments generated 6.97% in returns during the two-month period, while our senior secured loan and high yield investments generated 2.68% and 2.11% in returns, respectively. We continue to believe CLO debt is an attractive investment option for ARDC due to the compelling return and risk attributes of these securities. In today’s market, BB-rated CLO debt offers approximately 480 bps and 465 bps of spread premium, respectively, for a similarly rated loan and bond.¹⁰ CLO debt also typically possesses

Letter to Shareholders (continued)

As of December 31, 2019 (Unaudited) covering the partial reporting period from November 1, 2019 to December 31, 2019

attractive risk-mitigation features, such as over-collateralization and portfolio diversification, which do not exist when investing in single-borrower securities.

Reflecting our fundamental credit views and our conservative stance on the aging of the U.S. credit cycle, we continued to position our portfolio within higher-rated investments, and ARDC's portfolio of investments rated B, BB or BBB was 76.21% as of December 31, 2019.¹¹ In addition, the portfolio remains well diversified across 216 issuers and 26 industries.¹² The average position size across ARDC is 0.46% and the largest position is 1.43%.¹³

We continue to have strong conviction in the quality of the ARDC portfolio and believe that the Fund continues to be well positioned to take advantage of buying opportunities in both the new issue and secondary markets. We continue to believe that the ability to dynamically allocate is critical to successfully navigating an evolving market environment with headline risk and interest rate driven volatility. The increasing importance of credit selection has become the primary driver of generating alpha. Looking ahead, we will remain focused on performing solid fundamental credit analysis and in-depth due diligence as we seek attractive risk adjusted returns for our investors. We thank you again for your continued support in ARDC.

Best Regards,

Ares Capital Management II LLC

Ares Dynamic Credit Allocation Fund, Inc.

ARDC is a closed-end fund that trades on the New York Stock Exchange under the symbol "ARDC" and is externally managed by Ares Capital Management II LLC (the "Adviser"), a subsidiary of Ares Management Corporation. ARDC's investment objective is to provide an attractive level of total return, primarily through current income and, secondarily, through capital appreciation by investing in a broad, dynamically-managed portfolio of below investment grade senior secured loans, high yield corporate bonds and collateralized loan obligation securities.

On November 6, 2015, the Board of Directors (the "Board") of ARDC authorized the repurchase of shares of common stock of the Fund (the "Common Shares") on the open market when the Common Shares are trading on the New York Stock Exchange at a discount of 10% or more (or such other percentage as the Board may determine from time to time) from the net asset value ("NAV") of the Common Shares. The Fund may repurchase its outstanding Common Shares in open-market transactions at the Fund management's discretion. The Fund is not required to effect share repurchases. Any future purchases of Common Shares may not materially impact the discount of the market price of the Common Shares relative to their NAV and any narrowing of this discount that does result may not be maintained. Since the inception of the program through December 31, 2019, we have repurchased 566,217 shares at an average price of \$13.17, representing an average discount of -15.3%.

Thank you again for your continued support of ARDC. If you have any questions about the Fund, please call 1-877-855-3434, or visit the Fund's website at www.arespublicfunds.com.

Note: The opinions of the Adviser expressed herein are subject to change without notice. Information contained herein has been obtained from sources believed to be reliable, but is not guaranteed. This information should not be considered investment advice or an offer of any security for sale. This material may contain "forward-looking" information that is not purely historical in nature. No representations are made as to the accuracy of such information or that such information will be realized. Actual events or conditions are unlikely to be consistent with, and may differ materially from, those assumed. Past performance is not indicative of future results. Ares does not undertake any obligation to publicly update or review any forward-looking information, whether as a result of new information, future developments or otherwise, except as required by law.

Indices are provided for illustrative purposes only and not indicative of any investment. They have not been selected to represent appropriate benchmarks or targets for ARDC. Rather, the indices shown are provided solely to illustrate the performance of well-known and widely recognized indices. Any comparisons herein of the investment performance of ARDC to an index are qualified as follows: (i) the volatility of such index will likely be materially different from that of ARDC; (ii) such index will, in many cases, employ different investment guidelines and criteria than ARDC and, therefore, holdings in ARDC will differ significantly from holdings of the securities that comprise such index and ARDC may invest in different asset classes altogether from the illustrative index, which may materially impact the performance of ARDC relative to the index; and (iii) the performance of such index is disclosed solely to allow for comparison on ARDC's performance to that of a well-known index. Comparisons to indices have limitations because indices have risk profiles, volatility, asset composition and other material characteristics that will differ from ARDC. The indices do not reflect the deduction of fees or expenses. You cannot invest directly in an index. No representation is being made as to the risk profile of any benchmark or index relative to the risk profile of ARDC. There can be no assurance that the future performance of any specific investment, or product will be profitable, equal any corresponding indicated historical performance, or be suitable for a portfolio.

Letter to Shareholders *(continued)*

As of December 31, 2019 (Unaudited) covering the partial reporting period from November 1, 2019 to December 31, 2019

This may contain information sourced from Bank of America, used with permission. Bank of America's Global Research division's fixed income index platform is licensing the ICE BofA Indices and related data "as is," makes no warranties regarding same, does not guarantee the suitability, quality, accuracy, timeliness, and/or completeness of the ICE BofA Indices or any data included in, related to, or derived therefrom, assumes no liability in connection with their use and does not sponsor, endorse, or recommend Ares Management, or any of its products or services.

The ICE BofA US High Yield Index ("HOA0") tracks the performance of US dollar denominated below investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have a below investment grade rating (based on an average of Moody's, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one-year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and a minimum amount outstanding of \$100 million. Index constituents are capitalization-weighted based on their current amount outstanding times the market price plus accrued interest. Accrued interest is calculated assuming next-day settlement. Cash flows from bond payments that are received during the month are retained in the index until the end of the month and then are removed as part of the rebalancing. Cash does not earn any reinvestment income while it is held in the index. The index is rebalanced on the last calendar day of the month, based on information available up to and including the third business day before the last business day of the month. No changes are made to constituent holdings other than on month end rebalancing dates. Inception date: August 31, 1986.

ICE BofA BB US High Yield Index ("HOA1") is a subset of ICE BofA US High Yield Index including all securities rated BB1 through BB3, inclusive. Inception date: December 31, 1996.

The Credit Suisse Leveraged Loan Index ("CSLLI") is designed to mirror the investable universe of the \$US-denominated leveraged loan market. The index inception is January 1992. The index frequency is daily, weekly and monthly. New loans are added to the index on their effective date if they qualify according to the following criteria: 1) loan facilities must be rated "5B" or lower; 2) only fully-funded term loan facilities are included; 3) the tenor must be at least one year; and 4) issuers must be domiciled in developed countries.

¹¹ Based on S&P and/or Moody's rating. Credit quality is an assessment of the credit worthiness of an issuer of a security. AAA is the highest rating, meaning the obligor's capacity to meet its financial commitments is strong. As ratings decrease, the obligor is considered more speculative by market participants. Credit ratings apply only to the bonds and preferred securities in the portfolio and not to the shares of the fund which are not rated and will fluctuate in value.

¹² Based on the Credit Suisse Industry Classification. Diversification does not assure profit or protect against loss.

¹³ Diversification does not assure profit or protect against loss.

Schedule of Investments (continued)

December 31, 2019

Footnotes:

- (a) Investment holdings in foreign currencies are converted to U.S. Dollars using period end spot rates. All investments are in United States enterprises unless otherwise noted.
- (b) Interest rates on floating rate term loans adjust periodically based upon a predetermined schedule. Stated interest rates in this schedule represents the “all-in” rate as of December 31, 2019.
- (c) Variable rate coupon rate shown as of December 31, 2019.
- (d) This position or a portion of this position represents an unsettled loan purchase. The interest rate will be determined at the time of settlement and will be based upon the London-Interbank Offered Rate (“LIBOR” or “L”) or the applicable LIBOR floor plus a spread which was determined at the time of purchase.
- (e) Investments whose values were determined using significant unobservable inputs (Level 3) (See Note 3 of the Notes to Financial Statements).
- (f) As of December 31, 2019, the Fund had entered into the following commitments to fund various revolving and delayed draw senior secured and subordinated loans. Such commitments are subject to the satisfaction of certain conditions set forth in the documents governing these loans and there can be no assurance that such conditions will be satisfied. See Note 2 of the Notes to Financial Statements for further information on revolving and delayed draw loan commitments.

Unfunded commitment	Total revolving and delayed draw loan commitments	Less: drawn commitments	Total undrawn commitments
DCG Acquisition Corp.	\$297,428	\$0	\$297,428
Mister Car Wash Holdings, Inc.	98,540	0	98,540
Total	\$395,968	\$0	\$395,968

- (g) All of Ares Dynamic Credit Allocation Fund, Inc. (the “Fund”) Senior Loans, Collateralized Loan Obligations, Common Stocks, Warrants and Corporate Bonds issued as 144A, which as of December 31, 2019 represented 115.3% of the Fund’s net assets or 78.5% of the Fund’s total assets, are subject to legal restrictions on sales.
- (h) When-Issued or delayed delivery security based on typical market settlement convention for such security.
- (i) Collateralized Loan Obligations are all issued as 144A securities.
- (j) Non-income producing security as of December 31, 2019.
- (k) Security valued at fair value using methods determined in good faith or under the direction of the board of trustees.
- (l) Pay-In-Kind security (PIK), which may pay interest/dividends in additional par/shares.

As of December 31, 2019, the aggregate cost of securities for Federal income tax purposes was \$569,363,104. Unrealized appreciation and depreciation on investments for Federal income tax purposes are as follows:

Gross unrealized appreciation	\$ 11,841,337
Gross unrealized depreciation	(28,371,020)
Net unrealized depreciation	<u>\$(16,529,683)</u>

Abbreviations:

Statements of Changes in Net Assets

	For the Period Ended December 31, 2019 ^(a)	For the Year Ended October 31, 2019	For the Year Ended October 31, 2018
Increase (decrease) in net assets from operations:			
Net investment income	\$3,937,469	\$31,771,646	\$30,937,542
Net realized gain/(loss) on investments and foreign currency	(285,432)	(9,491,193)	4,020,664
Net unrealized gain/(loss) on investments and foreign currency	15,089,388	(17,716,274)	(16,880,811)
Net increase from operations	18,741,425	4,564,179	18,077,395
Distributions to shareholders from (Note 2):			
Distributable earnings	(4,926,712)	(29,565,391)	(29,506,878)
Increase (decrease) in net assets from operations and distributions	13,814,713	(25,001,212)	(11,429,483)
Share transactions:			
Cost of shares repurchased (Note 4)	—	(673,460)	—
Net decrease from share transactions	—	(673,460)	—
Total increase (decrease) in net assets	13,814,713	(25,674,672)	(11,429,483)
Net Assets, beginning of period	376,281,739	401,956,411	413,385,894
Net Assets, end of period	\$390,096,452	\$376,281,739	\$401,956,411

(a) For the two month period ended December 31, 2019. See Note 1 of Notes to Financial Statements.

Statements of Cash Flows

	For the Period Ended December 31, 2019 ^(a)	For the Year Ended October 31, 2019
Operating Activities:		
Net increase in net assets resulting from operations	\$18,741,425	\$4,564,179
Adjustments to reconcile net increase in net assets resulting from operations to net cash provided by operating activities:		
Purchases of investments	(63,578,517)	(441,049,358)
Proceeds from the sale of investments	71,865,557	434,243,833
Amortization and accretion of discounts and premiums, net	379,712	1,774,401
Net realized (gain)/loss on investments	325,785	9,694,555
Net unrealized (gain)/loss on investments	(15,152,621)	20,161,177
Effect of exchange rate changes on line of credit	21,694	(2,546,513)
Amortization of debt issuance cost	29,903	129,885
Changes in operating assets and liabilities:		
Receivable for securities sold	368,373	(2,707,611)
Interest and principal receivable	(846,563)	110,242
Other assets	(150,876)	(48,750)
Payable for securities purchased	(1,127,853)	(3,342,760)
Payable for investment advisory fees	(10,395)	(16,206)
Payable for interest expense	(47,181)	(59,482)
Payable for commitment fees	(5,192)	48,783
Payable for investor support fees	(727)	(1,135)
Payable for administration and transfer agent fees	(489)	(19,447)
Accrued expenses and other payables	150,913	180,951
Net cash provided by operating activities	10,962,948	21,116,744
Financing Activities:		
Borrowings on line of credit	27,500,000	144,204,362
Paydowns on line of credit	(33,692,240)	(137,584,653)
Deferred debt issuance costs	(3,314)	(137,506)
Cost of shares repurchased	—	(673,460)
Distributions paid to common shareholders	(4,926,712)	(29,565,391)

(a) Less than \$0.005.

(b) Based on net asset value per share. Distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Total Return is not annualized for periods less than one year.

(c) Not annualized.

(d) Based on market value per share (beginning market value common shares \$20.00). Distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan.

(e) Annualized.

Notes to Financial Statements

December 31, 2019

(1) Organization

Ares Dynamic Credit Allocation Fund, Inc. (NYSE: ARDC) (“ARDC” or “Fund”) is a corporation incorporated under the laws of the State of Maryland and registered with the U.S. Securities and Exchange Commission (the “SEC”) under the Investment Company Act of 1940, as amended (the “Investment Company Act”), as a closed-end, diversified, management investment company, and intends to qualify each year to be treated as a Regulated Investment Company (“RIC”), under Subchapter M of the Internal Revenue Code of 1986 (“the Code”), as amended. The Fund commenced operations on November 27, 2012. Ares Capital Management II LLC (the “Adviser”) was registered as a Registered Investment Adviser with the SEC on June 9, 2011 and serves as the investment adviser to the Fund.

Investment Objective and Policies

The Fund’s investment objective is to seek an attractive risk adjusted level of total return, primarily through current income and, secondarily, through capital appreciation. The Fund seeks to achieve its investment objective by investing primarily in a broad, dynamically managed portfolio of (i) senior secured loans (“Senior Loans”) made primarily to companies whose debt is rated below investment grade, (ii) corporate bonds (“Corporate Bonds”) that are primarily high yield issues rated below investment grade, (iii) other fixed-income instruments of a similar nature that may be represented by derivatives, and (iv) securities issued by entities commonly referred to as collateralized loan obligations (“CLOs”) and other asset-backed securities. The Fund’s investments in CLOs may include investments in subordinated tranches of CLO securities. The Adviser will dynamically allocate the Fund’s portfolio among investments in the various targeted credit markets, to seek to manage interest rate and credit risk and the duration of the Fund’s portfolio. Under normal market conditions, the Fund will not invest more than (i) 40% of its Managed Assets in CLOs and other asset-backed securities, or (ii) 10% of its Managed Assets in subordinated (or residual) tranches of CLO securities. “Managed Assets” means the total assets of the Fund (including any assets attributable to any preferred shares that may be issued or to indebtedness) minus the Fund’s liabilities other than liabilities relating to indebtedness.

Fiscal Year End Change

On September 25, 2019, the Fund’s board of directors approved a change to the fiscal year end of the Fund from October 31 to December 31. Accordingly, the Fund’s financial statements and related notes include information as and for the two month period ended December 31, 2019, and the year ended October 31, 2019.

(2) Significant Accounting Policies

Basis of Presentation

The accompanying financial statements have been prepared on an accrual basis of accounting in conformity with U.S. generally accepted accounting principles (“GAAP”) and includes the accounts of the Fund. The Fund is an investment company following accounting and reporting guidance in Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946, *Financial Services — Investment Companies*. The Adviser makes estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results may differ from those estimates and such differences may be material.

Investments Valuation

All investments in securities are recorded at their fair value. See Note 3 for more information on the Fund’s valuation process.

Interest Income

Interest income is recorded on the accrual basis to the extent that such amounts are expected to be collected and adjusted for accretion of discounts and amortization of premiums. The Fund may have investments that contain payment-in-kind (“PIK”) provisions. The PIK interest, computed at the contractual rate specified, may be added to the principal balance and adjusted cost of the investments and recorded as interest income. All interest for the period ended December 31, 2019 and year ended October 31, 2019 was recorded as cash.

Discounts and Premiums

Discounts and premiums on securities purchased are accreted/amortized over the life of the respective security using the effective interest method. The adjusted cost of investments represents the original cost adjusted for PIK interest, the accretion of discounts, and amortization of premiums.

Cash and Cash Equivalents

The Fund considers all highly liquid investments with original maturities of 90 days or less to be cash equivalents. The Fund’s cash and cash equivalents are maintained with a major United States financial institution, which is a member of the Federal Deposit Insurance Corporation. While the Fund’s current cash balance exceeds insurance limits, the risk of loss is remote.

Investment Transactions, Related Investment Income and Expenses

Investment transactions are accounted for on the trade date. Interest income, adjusted for amortization of premiums and

Notes to Financial Statements (continued)

December 31, 2019

accretion of discounts on investments, is earned from settlement date and is recorded on the accrual basis. Realized gains and losses are reported on the specific identification method. Expenses are recorded on the accrual basis as incurred.

Foreign Currency Transactions and Forward Foreign Currency Contracts

Amounts denominated in foreign currencies are translated into U.S. dollars on the following basis: (i) investments and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based upon currency exchange rates effective on the date of valuation; and (ii) purchases and sales of investments and income and expense items denominated in foreign currencies are translated into U.S. dollars based upon currency exchange rates prevailing on transaction dates.

The Fund does not isolate that portion of the results of operations resulting from the changes in foreign exchange rates on investments from fluctuations arising from changes in market prices of securities held. Such fluctuations are included within the net realized and unrealized gain (loss) on investments in the Statement of Operations.

Reported net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates of securities transactions, and the difference between the amounts of income and expense items recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign currency gains and losses arise from the changes in fair values of assets and liabilities, other than investments in securities at period end, resulting from changes in exchange rates.

Investments in foreign companies and securities of foreign governments may involve special risks and considerations not typically associated with investing in U.S. companies and securities of the U.S. government. These risks include, among other things, revaluation of currencies, less reliable information about issuers, different transaction clearance and settlement practices, and potential future adverse political and economic developments. Moreover, investments in foreign companies and securities of foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies and the U.S. government.

The Fund may enter into forward foreign currency exchange contracts for operational purposes and to protect against adverse exchange rate fluctuations. A forward foreign currency contract is an agreement between the Fund and a counterparty to buy or sell a foreign currency at a specific

exchange rate on a future date. The Fund may also enter into these contracts for purposes of increasing exposure to a foreign currency or to shift exposure to foreign currency fluctuations from one currency to another. The net U.S. dollar value of foreign currency underlying all contractual commitments held by the Fund and the resulting unrealized appreciation or depreciation are determined using foreign currency exchange rates from an independent pricing service. The Fund is subject to the credit risk that the other party will not complete the obligations of the contract. The fair values of the forward foreign currency exchange contracts are obtained from an independent pricing source.

Dividends to Shareholders

The Fund intends to make regular monthly cash distributions of all or a portion of its net investment income available to common shareholders. The Fund intends to pay common shareholders at least annually all or substantially all of its net investment income. The Fund intends to pay any capital gains distributions at least annually. Dividends to shareholders are recorded on the ex-dividend date.

The distributions for any full or partial year might not be made in equal amounts, and one distribution may be larger than another. The Fund will make distributions only if authorized by its board of directors and declared by the Fund out of assets legally available for these distributions. The Fund may pay a special distribution at the end of each calendar year. This distribution policy may, under certain circumstances, have certain adverse consequences to the Fund and its shareholders because it may result in a return of capital to shareholders, which would reduce the Fund's net asset value and, over time, potentially increase the Fund's expense ratios. If the Fund distributes a return of capital, it means that the Fund is returning to shareholders a portion of their investment rather than making a distribution that is funded from the Fund's earned income or other profits. The board of directors may elect to change the Fund's distribution policy at any time.

Commitments and Contingencies

In the normal course of business, the Fund's investment activities involve executions, settlement and financing of various transactions resulting in receivables from, and payables to, brokers, dealers and the Fund's custodian. These activities may expose the Fund to risk in the event that such parties are unable to fulfill contractual obligations. Management does not anticipate any material losses from counterparties with whom it conducts business. Consistent with standard business practice, the Fund enters into contracts that contain a variety of indemnifications, and is engaged from time to time in various legal actions. The maximum exposure of the Fund under these arrangements and activities is

Notes to Financial Statements (continued)

December 31, 2019

unknown. However, the Fund expects the risk of material loss to be remote.

Commitments to extend credit include loan proceeds the Fund is obligated to advance, such as delayed draws or revolving credit arrangements. Commitments generally have fixed expiration dates or other termination clauses. Unrealized gains or losses associated with unfunded commitments are recorded in the financial statements and reflected as an adjustment to the fair value of the related security in the Schedule of Investments. The par amount of the unfunded commitments is not recognized by the Fund until it becomes funded. As of December 31, 2019, the value of loans disclosed in the Schedule of Investments does not include unfunded commitments, which total \$395,968.

Income Taxes

The Fund intends to distribute all or substantially all of its taxable income and to comply with the other requirements of the Code, as amended, applicable to RICs. Accordingly, no provision for U.S. federal income taxes is required.

The Fund may elect to incur an excise tax if it is deemed prudent by its board of directors from a cash management perspective or in the best interest of shareholders due to other facts and circumstances. For the period ended December 31, 2019 and year ended October 31, 2019, the Fund incurred U.S. federal excise taxes of \$15,997 and \$70,000 respectively.

As of December 31, 2019, which is the end of the Fund's taxable year, the Fund had no uncertain tax positions that would require financial statement recognition, derecognition, or disclosure. The Fund files a U.S. federal income tax return annually after its fiscal year-end, which is subject to examination by the Internal Revenue Service for a period of three years from the date of filing.

Net investment income and net realized gains and losses may differ for financial statement and tax purposes because of temporary or permanent book/tax differences. These differences are primarily due to differing treatments for foreign currency gains and losses, distributions, excise taxes, pay down gains and losses and losses due to wash sales, and QEF income and capital gains. To the extent these differences are permanent, reclassifications are made to the appropriate capital accounts in the fiscal period that the differences arise. On the Statement of Assets and Liabilities, the following reclassifications were made:

	December 31, 2019	October 31, 2019
Additional paid-in capital/(reduction)	\$(15,997)	\$(70,000)
Distributable earnings accumulated loss	15,997	70,000

The characterization of distributions made during the fiscal period from net investment income or net realized gains may differ from its ultimate characterization for federal income tax purposes. In addition, due to the timing of dividend distributions, the fiscal period in which amounts are distributed may differ from the fiscal period that the income or realized gains or losses were recorded by the Fund.

The characterization of distributions paid during the period ended December 31, 2019 and year ended October 31, 2019 was as follows:

	December 31, 2019	October 31, 2019
Ordinary income	\$4,926,712	\$29,565,391
Capital gain	—	—
Return of capital	—	—

For the period ended December 31, 2019 and year ended October 31, 2019, the components of accumulated earnings (deficit) on a tax basis were as follows:

	December 31, 2019	October 31, 2019
Undistributed ordinary income	\$ 4,700,563	\$ 5,476,923
Undistributed capital gains	—	—
Accumulated capital and other losses	(42,084,678)	(41,700,708)
Net unrealized appreciation (depreciation)	(16,624,118)	(31,615,158)
Total accumulated deficit	\$(54,008,233)	\$(67,838,943)

As of December 31, 2019, the Fund had capital loss carryovers as indicated below. The capital loss carryovers are available to offset future realized capital gains to the extent provided in the Code and regulations promulgated thereunder.

No Expiration Short-Term ⁽¹⁾	No Expiration Long-Term ⁽¹⁾
\$4,307,993	\$37,776,685

(1) On December 22, 2010, the Regulated Investment Company Modernization Act of 2010 (the "Modernization Act") was signed into law. The Modernization Act modifies several of the federal income and excise tax provisions related to RICs. Under the Modernization Act, new capital losses may now be carried forward indefinitely, and retain the character of the original loss as compared with pre-enactment law where capital losses could be carried forward for eight years, and carried forward as short-term capital losses, irrespective of the character of the original loss. These losses without expiration must be used prior to the loss layers with expiration.

During the period ended December 31, 2019, the Fund did not utilize capital loss carryforwards.

ASC 740, *Income Taxes*, provides guidance for how uncertain tax positions should be recognized, measured, presented, and disclosed in the financial statements. The Fund has evaluated

Notes to Financial Statements (continued)

December 31, 2019

the implications of ASC 740 for all open tax years, and have determined there is no impact to the Fund's financial statements as of period ended December 31, 2019. The Fund's federal and state income returns for which the applicable statutes of limitations have not expired remain subject to examination by the Internal Revenue Service and states department of revenue.

All penalties and interest associated with income taxes, if any, are included in other expenses in the Statement of Operations. There were no penalties and interest incurred by the Fund for the current fiscal year.

Deferred Debt Issuance Costs

Debt issuance costs are amortized over the life of the related debt instrument using the straight line method.

Recently Issued Accounting Pronouncements

In March 2017, the FASB issued *ASU No. 2017-08, Receivables — Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities*. The amendments in the ASU shorten the amortization period for certain callable debt securities, held at a premium, to be amortized to the earliest call date. The ASU does not require an accounting change for securities held at a discount, which continue to be amortized to maturity. The ASU is effective for fiscal years and for interim periods within those fiscal years beginning after December 15, 2018. The Fund has adopted and applied ASU 2017-08 on a modified retrospective basis through a cumulative-effect adjustment as of the beginning of the period of adoption. As a result of the adoption of ASU 2017-08, as of November 1, 2019, the amortized cost basis of investments was reduced and unrealized appreciation of investments was increased. The adoption of ASU 2017-08 had no impact on beginning net assets, the current period results from operations, or any prior period information presented in the financial statements.

(3) Investments

Fair Value Measurements

The Fund follows the provisions of ASC 820, *Fair Value Measurements and Disclosures* under U.S. GAAP, which among other matters, requires enhanced disclosures about investments that are measured and reported at fair value. This standard defines fair value and establishes a hierarchal disclosure framework, which prioritizes and ranks the level of market price observability used in measuring investments at fair value and expands disclosures about assets and liabilities measured at fair value. ASC 820 defines "fair value" as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market

participants at the measurement date. The hierarchal disclosure framework establishes a three-tier hierarchy to maximize the use of observable data and minimize the use of unobservable inputs. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique.

Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

- Level 1 — Valuations based on quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.
- Level 2 — Valuations based on quoted prices in markets that are not active or which all significant inputs are observable either directly or indirectly.
- Level 3 — Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

In addition to using the above inputs in investment valuations, the Fund continues to employ a valuation policy that is consistent with the provisions of ASC 820. Consistent with the Fund's valuation policy, the Fund evaluates the source of inputs, including any markets in which the Fund's investments are trading (or any markets it evaluates in which securities with similar attributes are trading), in determining fair value. The Fund's valuation policy considers the fact that because there may not be a readily available market value for the investments in the Fund's portfolio, therefore, the fair value of the investments may be determined using unobservable inputs.

The investments classified as Level 1 or Level 2 are typically valued based on quoted market prices, forward foreign exchange rates, dealer quotations or alternative pricing sources supported by observable inputs. The Adviser obtains prices from independent pricing services which generally utilize broker quotes and may use various other pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data. The Adviser is responsible for

Notes to Financial Statements (continued)

December 31, 2019

all inputs and assumptions related to the pricing of securities. The Adviser has internal controls in place that support its reliance on information received from third-party pricing sources. As part of its internal controls, the Adviser obtains, reviews, and tests information to corroborate prices received from third-party pricing sources. For any security, if market or dealer quotations are not readily available, or if the Adviser determines that a quotation of a security does not represent a fair value, then the security is valued at a fair value as determined in good faith by the Adviser and will be classified as Level 3. In such instances, the Adviser will use valuation techniques consistent with the market or income approach to measure fair value and will give consideration to all factors which might reasonably affect the fair value.

Senior loans and corporate debts: The fair value of senior loans and corporate debt is estimated based on quoted market prices, forward foreign exchange rates, dealer quotations or alternative pricing sources supported by observable inputs and are generally classified within Level 2 or 3. The Adviser obtains prices from independent pricing services which generally utilize broker quotes and may use various other pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data. If the pricing services are only able to obtain a single broker quote or utilize a pricing model the securities will be classified as Level 3. If the pricing services are unable to provide prices, the Adviser will attempt to obtain one or more broker quotes directly from a dealer and price such securities at the last bid price obtained; such securities are classified as Level 3.

Collateralized loan obligations: The fair value of CLOs is estimated based on various valuation models from third-party pricing services as well as internal models. The valuation models generally utilize discounted cash flows and take into consideration prepayment and loss assumptions, based on historical experience and projected performance, economic factors, the characteristics and condition of the underlying collateral, comparable yields for similar securities and recent trading activity. These securities are classified as Level 3.

Common Stocks and warrants: The fair value of common stocks and warrants are estimated using either broker quotes or an analysis of the enterprise value (“EV”) of the portfolio company. Enterprise value means the entire value of the portfolio company to a market participant, including the sum

of the values of debt and equity securities used to capitalize the enterprise at a point in time. The primary method for determining EV uses a multiple analysis whereby appropriate multiples are applied to the portfolio company’s EBITDA (generally defined as net income before net interest expense, income tax expense, depreciation and amortization). EBITDA multiples are typically determined based upon review of market comparable transactions and publicly traded comparable companies, if any. The Fund may also employ other valuation multiples to determine EV, such as revenues. The second method for determining EV uses a discounted cash flow analysis whereby future expected cash flows of the portfolio company are discounted to determine a present value using estimated discount rates (typically a weighted average cost of capital based on costs of debt and equity consistent with current market conditions). The EV analysis is performed to determine the value of equity investments, the value of debt investments in portfolio companies where the Fund has control or could gain control through an option or warrant security, and to determine if there is credit impairment for debt investments. If debt investments are credit impaired, an EV analysis may be used to value such debt investments; however, in addition to the methods outlined above, other methods such as a liquidation or wind down analysis may be utilized to estimate enterprise value.

The following is a summary of inputs used as of December 31, 2019 in valuing the Fund’s investments carried at fair value:

	Level 1 — Quoted Prices (\$)	Level 2 — Other Significant Observable Inputs (\$)	Level 3 — Significant Unobservable Inputs (\$)	Total (\$)
Senior Loans	—	106,038,643	15,596,819	121,635,462
Corporate Bonds	—	251,617,658	—	251,617,658
Collateralized Loan Obligations	—	—	179,580,301	179,580,301
Common Stocks	—	—	—	—
Warrants	—	—	—	—
Total Investments	—	357,656,301	195,177,120	552,833,421

The following is a reconciliation of the Fund’s investments in which significant unobservable inputs (Level 3) were used in determining fair value.

Notes to Financial Statements (continued)

December 31, 2019

For the year ended December 31, 2019:

	Senior Loans (\$)	Collateralized Loan Obligations (\$)	Common Stock (\$)	Warrants (\$)	Total (\$)
Balance as of October 31, 2019	12,743,556	169,510,000	—	—	182,253,556
Purchases ^(a)	2,201,828	4,925,267	—	—	7,127,095
Sales ^(b)	(3,505,489)	(4,998,175)	—	—	(8,503,664)
Net realized and unrealized gain/ (loss)	36,246	10,114,586	—	—	10,150,832
Net accrued discounts	3,207	28,623	—	—	31,830
Transfers in to Level 3	6,998,721	—	—	—	6,998,721
Transfers out of Level 3	(2,881,250)	—	—	—	(2,881,250)
Balance as of December 31, 2019	15,596,819	179,580,301	—	—	195,177,120
Net change in unrealized appreciation/(depreciation) from investments held as of December 31, 2019	13,515	9,813,243	—	—	9,826,758

(a) Purchases include PIK interest and securities received from restructure.

(b) Sales include principal redemptions.

Investments were transferred into and out of Level 3 and out of and into Level 2 during the year ended December 31, 2019 due to changes in the quantity and quality of information obtained to support the fair value of each investment as assessed by the Adviser. The valuation techniques used by the Adviser to measure fair value as of December 31, 2019 maximized the use of observable inputs and minimized the use of unobservable inputs. The valuation techniques and significant amounts of unobservable inputs used in the valuation of the Fund's Level 3 securities are outlined in the table below.

	Fair Value (\$)	Valuation Technique	Unobservable Inputs	Range	Weighted Average
Assets					
Investments in securities					
Senior Loans	15,596,819	Broker Quotes and/or 3rd Party Pricing Services	N/A	N/A	N/A
Collateralized Loan Obligations	179,580,301	Broker Quotes and/or 3rd Party Pricing Services	N/A	N/A	N/A
Common Stock	—	Enterprise Value Analysis — Adjusted NAV	IOI	N/A	N/A
Warrants	—	Enterprise Value Analysis — Adjusted NAV	EBITDA	10x	10x
Total Level 3 Investments	195,177,120				

Notes to Financial Statements (continued)

December 31, 2019

(4) Common Stock

Common share transactions were as follows:

	Period Ended December 31, 2019		Year Ended October 31, 2019	
	Shares	Amount (\$)	Shares	Amount (\$)
Common shares outstanding — beginning of period	22,914,939	429,112,863	22,962,441	429,786,323
Common shares repurchased — shares repurchase plan	—	—	(47,502)	(673,460)
Common shares outstanding — end of period	22,914,939	429,112,863	22,914,939	429,112,863

The board of directors has authorized the repurchase of shares of the Fund's outstanding common stock on the open market at the Fund management's discretion when shares of the common stock are trading on the NYSE at a discount of 10% or more (or such other percentage as the board of directors may determine from time to time) from the net asset value of the shares. The Fund is not required to effect common share repurchases. Any such purchases of Fund shares of common stock may not materially impact the discount of the market price of the Fund's shares of common stock relative to their net asset value and any narrowing of this discount that does result may not be maintained.

(5) Credit Facility

The Fund is a party to a senior secured revolving credit facility (as amended, the "Credit Facility"), which allows for the Fund to borrow up to \$212 million at any one time outstanding. The Credit Facility maturity date is October 2, 2021. Under the Credit Facility, the Fund is required to comply with various covenants, reporting requirements and other customary requirements for similar revolving credit facilities, including, without limitation, covenants related to: (a) limitations on the incurrence of additional indebtedness and liens, (b) limitations on certain investments, (c) limitations on certain restricted payments, and (d) maintaining a ratio of total assets (less total liabilities other than indebtedness) to total indebtedness of the Fund of not less than 3:1.0. These covenants are subject to important limitations and exceptions that are described in the documents governing the Credit Facility. Amounts available to borrow under the Credit Facility (and the incurrence of certain other permitted debt) are also subject to compliance with a borrowing base that applies different advance rates to different types of assets in the Fund's portfolio that are pledged as collateral.

As of December 31, 2019, there was \$163,316,318 outstanding under the Credit Facility. Loans under the Credit Facility generally bear interest at the applicable LIBOR rate plus 0.95%. Unused portions of the Credit Facility accrue a commitment fee equal to an annual rate of 0.15%. The fair value of the Fund's borrowings under the Credit Facility approximates the carrying amount presented in the

accompanying Statement of Assets and Liabilities at cost for the remaining maturity for which the Fund has determined would be categorized as Level 2 in the fair value hierarchy.

For the period ended December 31, 2019 the components of interest and unused commitment fees expense, average stated interest rates (i.e., rate in effect plus the spread) and average outstanding balances for the Credit Facility were as follows:

	For the Period Ended December 31, 2019 (\$)	For the Year Ended October 31, 2019 (\$)
Stated interest expense	707,788	5,209,026
Unused commitment fees	13,251	\$72,969
Total interest and credit facility fees expense	721,039	5,281,995
Annualized average stated interest rate	2.65%	3.22%
Average outstanding balance	159,866,345	164,020,384
Amortization of debt issuance costs	29,903	129,885

Under the Investment Company Act, the Fund is not permitted to incur indebtedness, including through the issuance of debt securities, unless immediately thereafter the Fund will have an asset coverage of at least 300%. In general, the term "asset coverage" for this purpose means the ratio which the value of the total assets of the Fund, less all liabilities and indebtedness not represented by senior securities, bears to the aggregate amount of senior securities representing indebtedness of the Fund. In addition, the Fund may be limited in its ability to declare any cash distribution on its capital stock or purchase its capital stock unless, at the time of such declaration or purchase, the Fund has an asset coverage (on its indebtedness) of at least 300% after deducting the amount of such distribution or purchase price, as applicable. For non-public indebtedness issued by the Fund (for example, the Credit Facility), the Fund may be able to continue to pay distributions on its capital stock or purchase its capital stock even if the asset coverage ratio on its indebtedness falls below 300%. As of December 31, 2019, the Fund's asset coverage was 339%.

Notes to Financial Statements (continued)

December 31, 2019

(6) Investment Advisory and Other Agreements

The Adviser is registered as an investment adviser under the Investment Advisers Act of 1940, as amended (the “Advisers Act”). The Adviser is an affiliate of Ares Management Corporation (“Ares”) and leverages Ares’ entire investment platform and benefits from the significant capital markets, trading and research expertise of all of Ares’ investment professionals.

The Adviser provides certain investment advisory and administrative services to the Fund pursuant to the investment advisory agreement with the Fund (“Investment Advisory Agreement”). Pursuant to its Investment Advisory Agreement, the Fund has agreed to pay the Adviser a management fee at an annual rate of 1.00% of the average daily value of the Fund’s total assets (including any assets attributable to any preferred shares that may be issued or to indebtedness) minus the Fund’s liabilities other than liabilities relating to indebtedness (“Managed Assets”). The management fees incurred by the Fund for the period ended December 31, 2019 and year ended October 31, 2019 were \$901,705 and \$5,535,855 respectively.

In addition to advisory services, the Adviser and its affiliates provide certain administrative services to the Fund at the Fund’s request. Under the Investment Advisory Agreement, the Adviser may seek reimbursement from the Fund for the costs of these administrative services provided to the Fund by the Adviser and its affiliates. The Fund incurred such administrative costs for the period ended December 31, 2019 and year ended October 31, 2019 of \$68,019 and \$405,138 respectively.

The Fund has engaged State Street Bank and Trust Company (“State Street”) to serve as the Fund’s administrator, custodian and transfer agent. Under the service agreements between State Street and the Fund, State Street provides certain administrative services necessary for the operation of the Fund. Such services include maintaining certain Fund books and records, providing accounting and tax services and preparing certain regulatory filings. State Street also performs custodial, fund accounting and portfolio accounting services, as well as transfer agency and dividend paying services with respect to the common shares. The Fund pays State Street for these services. The total expenses incurred by the Fund for the period ended December 31, 2019 and year ended October 31, 2019 were \$69,524 and \$424,614 respectively.

The Fund has retained Destra Capital Investments LLC (“Destra”) to provide investor support services in connection with the ongoing operations of the Fund. Such services

include providing ongoing contact with respect to the Fund and its performance with financial advisors that are representatives of broker-dealers and other financial intermediaries, communicating with the NYSE specialist for the Fund’s common shares and with the closed-end fund analyst community regarding the Fund on a regular basis, and maintaining a website for the Fund. The Fund pays Destra a fee equal to 0.07% of Managed Assets per annum for these services. The terms of this agreement are in effect for an initial period of two years and shall thereafter continue for successive one year periods.

The total expenses incurred by the Fund for the period ended December 31, 2019 and year ended October 31, 2019 were \$63,119 and \$387,510 respectively.

(7) Investment Transactions

For the period ended December 31, 2019, the cost of investments purchased and proceeds from the sale of investments, excluding short obligations, were as follows:

Cost of Investments Purchased	Proceeds from the Sale of Investments
\$63,875,945	\$(71,065,756)

(8) Risk Factors

Senior Loans Risk

Although senior loans (“Senior Loans”) are senior and typically secured in a first or second lien position in contrast to other below investment grade fixed income instruments, which are often subordinated or unsecured, the risks associated with such Senior Loans are generally similar to the risks of other below investment grade fixed income instruments. Investments in below investment grade Senior Loans are considered speculative because of the credit risk of the issuers of debt instruments (each, a “Borrower”). Such Borrowers are more likely than investment grade Borrowers to default on their payments of interest and principal owed to the Fund, and such defaults could reduce the net asset value of the Fund and income distributions. An economic downturn would generally lead to a higher non-payment rate, and a Senior Loan may lose significant market value before a default occurs. Moreover, any specific collateral used to secure a Senior Loan may decline in value or become illiquid, which could adversely affect the Senior Loan’s value.

Senior Loans are subject to the risk of non-payment of scheduled interest or principal. Such non-payment would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the net asset value of the Fund. There can be no assurance that the liquidation of any collateral securing a Senior Loan would

Notes to Financial Statements (continued)

December 31, 2019

satisfy the Borrower's obligation in the event of nonpayment of scheduled interest or principal payments, whether when due or upon acceleration, or that the collateral could be liquidated, readily or otherwise. In the event of bankruptcy or insolvency of a Borrower, the Fund could experience delays or limitations with respect to its ability to realize the benefits of the collateral, if any, securing a Senior Loan. The collateral securing a Senior Loan, if any, may lose all or substantially all of its value in the event of the bankruptcy or insolvency of a Borrower. Some Senior Loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate such Senior Loans to presently existing or future indebtedness of the Borrower or take other action detrimental to the holders of Senior Loans including, in certain circumstances, invalidating such Senior Loans or causing interest previously paid to be refunded to the Borrower. Additionally, a Senior Loan may be "primed" in bankruptcy, which reduces the ability of the holders of the Senior Loan to recover on the collateral.

There may be less readily available information about most Senior Loans and the Borrowers thereunder than is the case for many other types of securities, including securities issued in transactions registered under the Securities Act of 1933, as amended (the "Securities Act") or the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and Borrowers subject to the periodic reporting requirements of Section 13 of the Exchange Act. Senior Loans may be issued by companies that are not subject to SEC reporting requirements and these companies, therefore, do not file reports with the SEC that must comply with SEC form requirements and, in addition, are subject to a less stringent liability disclosure regime than companies subject to SEC reporting requirements. As a result, the Adviser will rely primarily on its own evaluation of a Borrower's credit quality rather than on any available independent sources. Consequently, the Fund will be particularly dependent on the analytical abilities of the Adviser. In certain circumstances, Senior Loans may not be deemed to be securities under certain federal securities laws, other than the Investment Company Act. Therefore, in the event of fraud or misrepresentation by a Borrower or an arranger, the Fund may not have the protection of the antifraud provisions of the federal securities laws as would otherwise be available for bonds or stocks. Instead, in such cases, parties generally would rely on the contractual provisions in the Senior Loan agreement itself and common law fraud protections under applicable state law.

The secondary trading market for Senior Loans may be less liquid than the secondary trading market for registered investment grade debt securities. No active trading market may exist for certain Senior Loans, which may make it

difficult to value them. Illiquidity and adverse market conditions may mean that the Fund may not be able to sell Senior Loans quickly or at a fair price. To the extent that a secondary market does exist for certain Senior Loans, the market for them may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods.

Senior Loans are subject to legislative risk. If legislation or state or federal regulations impose additional requirements or restrictions on the ability of financial institutions to make loans, the availability of Senior Loans for investment by the Fund may be adversely affected. In addition, such requirements or restrictions could reduce or eliminate sources of financing for certain Borrowers. This would increase the risk of default. If legislation or federal or state regulations require financial institutions to increase their capital requirements this may cause financial institutions to dispose of Senior Loans that are considered highly levered transactions. If the Fund attempts to sell a Senior Loan at a time when a financial institution is engaging in such a sale, the price the Fund could receive for the Senior Loan may be adversely affected.

Subordinated Loans Risk

Subordinated loans generally are subject to similar risks as those associated with investments in Senior Loans, except that such loans are subordinated in payment and/or lower in lien priority to first lien holders. In the event of default on a Subordinated Loan, the first priority lien holder has first claim to the underlying collateral of the loan to the extent such claim is secured. Additionally, an over secured creditor may be entitled to additional interest and other charges in bankruptcy increasing the amount of their allowed claim. Subordinated Loans are subject to the additional risk that the cash flow of the Borrower and property securing the loan or debt, if any, may be insufficient to meet scheduled payments after giving effect to the senior obligations of the Borrower. This risk is generally higher for subordinated unsecured loans or debt, which are not backed by a security interest in any specific collateral. Subordinated Loans generally have greater price volatility than Senior Loans and may be less liquid.

Corporate Bonds Risk

The market value of a corporate bond generally may be expected to rise and fall inversely with interest rates. The market value of intermediate- and longer-term corporate bonds is generally more sensitive to changes in interest rates than is the market value of shorter-term corporate bonds. The market value of a corporate bond also may be affected by factors directly related to the Borrower, such as investors' perceptions of the creditworthiness of the Borrower, the Borrower's financial performance, perceptions of the

Notes to Financial Statements *(continued)*

December 31, 2019

Borrower in the market place, performance of management of the Borrower, the Borrower's capital structure and use of financial leverage and demand for the Borrower's goods and services. There is a risk that the Borrowers of corporate bonds may not be able to meet their obligations on interest or principal payments at the time called for by an instrument. High yield corporate bonds are often high risk and have speculative characteristics. High yield corporate bonds may be particularly susceptible to adverse Borrower-specific developments.

CLO Securities Risk

CLOs issue securities in tranches with different payment characteristics and different credit ratings. The rated tranches of securities issued by CLOs ("CLO Securities") are generally assigned credit ratings by one or more nationally recognized statistical rating organizations. The subordinated (or residual) tranches do not receive ratings. Below investment grade tranches of CLO Securities typically experience a lower recovery, greater risk of loss or deferral or non-payment of interest than more senior tranches of the CLO.

The riskiest portion of the capital structure of a CLO is the subordinated (or residual) tranche, which bears the bulk of defaults from the loans in the CLO and serves to protect the other, more senior tranches from default in all but the most severe circumstances. Since it is partially protected from defaults, a senior tranche from a CLO typically has higher ratings and lower yields than the underlying securities, and can be rated investment grade. Despite the protection from the subordinated tranche, CLO tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to collateral default and disappearance of protecting tranches, market anticipation of defaults and aversion to CLO Securities as a class. The risks of an investment in a CLO depend largely on the collateral and the tranche of the CLO in which the Fund invests.

The CLOs in which the Fund invests may have issued and sold debt tranches that will rank senior to the tranches in which the Fund invests. By their terms, such more senior tranches may entitle the holders to receive payment of interest or principal on or before the dates on which the Fund is entitled to receive payments with respect to the tranches in which the Fund invests. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a CLO, holders of more senior tranches would typically be entitled to receive payment in full before the Fund receives any distribution. After repaying such senior creditors, such CLO may not have any remaining assets to use for repaying its obligation to the Fund. In the case of tranches ranking equally with the tranches in which the Fund invests, the Fund would have to share on an

equal basis any distributions with other creditors holding such securities in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant CLO. Therefore, the Fund may not receive back the full amount of its investment in a CLO.

The transaction documents relating to the issuance of CLO Securities may impose eligibility criteria on the assets of the CLO, restrict the ability of the CLO's investment manager to trade investments and impose certain portfolio-wide asset quality requirements. These criteria, restrictions and requirements may limit the ability of the CLO's investment manager to maximize returns on the CLO Securities. In addition, other parties involved in CLOs, such as third-party credit enhancers and investors in the rated tranches, may impose requirements that have an adverse effect on the returns of the various tranches of CLO Securities. Furthermore, CLO Securities issuance transaction documents generally contain provisions that, in the event that certain tests are not met (generally interest coverage and over-collateralization tests at varying levels in the capital structure), proceeds that would otherwise be distributed to holders of a junior tranche must be diverted to pay down the senior tranches until such tests are satisfied. Failure (or increased likelihood of failure) of a CLO to make timely payments on a particular tranche will have an adverse effect on the liquidity and market value of such tranche.

Payments to holders of CLO Securities may be subject to deferral. If cash flows generated by the underlying assets are insufficient to make all current and, if applicable, deferred payments on CLO Securities, no other assets will be available for payment of the deficiency and, following realization of the underlying assets, the obligations of the Borrower of the related CLO Securities to pay such deficiency will be extinguished.

The market value of CLO Securities may be affected by, among other things, changes in the market value of the underlying assets held by the CLO, changes in the distributions on the underlying assets, defaults and recoveries on the underlying assets, capital gains and losses on the underlying assets, prepayments on underlying assets and the availability, prices and interest rate of underlying assets. Furthermore, the leveraged nature of each subordinated class may magnify the adverse impact on such class of changes in the value of the assets, changes in the distributions on the assets, defaults and recoveries on the assets, capital gains and losses on the assets, prepayment on assets and availability, price and interest rates of assets. Finally, CLO Securities are limited recourse and may not be paid in full and may be subject to up to 100% loss.

Notes to Financial Statements (continued)

December 31, 2019

Asset-Backed Securities Risk

Asset-backed securities often involve risks that are different from or more acute than risks associated with other types of debt instruments. For instance, asset-backed securities may be particularly sensitive to changes in prevailing interest rates. In addition, the underlying assets are subject to prepayments that shorten the securities' weighted average maturity and may lower their return. Asset-backed securities are also subject to risks associated with their structure and the nature of the assets underlying the security and the servicing of those assets. Payment of interest and repayment of principal on asset-backed securities is largely dependent upon the cash flows generated by the assets backing the securities and, in certain cases, supported by letters of credit, surety bonds or other credit enhancements. The values of asset-backed securities may be substantially dependent on the servicing of the underlying asset pools, and are therefore subject to risks associated with the negligence by, or defalcation of, their servicers. Furthermore, debtors may be entitled to the protection of a number of state and federal consumer credit laws with respect to the assets underlying these securities, which may give the debtor the right to avoid or reduce payment. In addition, due to their often complicated structures, various asset-backed securities may be difficult to value and may constitute illiquid investments. If many Borrowers on the underlying loans default, losses could exceed the credit enhancement level and result in losses to investors in asset-backed securities.

Investment and Market Risk

An investment in the common shares of the Fund is subject to investment risk, including the possible loss of the entire principal amount invested. An investment in the common shares of the Fund represents an indirect investment in the portfolio of Senior Loans, Corporate Bonds, CLO Securities and other securities and loans owned by the Fund, and the value of these securities and loans may fluctuate, sometimes rapidly and unpredictably. For instance, during periods of global economic downturn, the secondary markets for Senior Loans and investments with similar economic characteristics (such as second lien loans and unsecured loans) and Corporate Bonds may experience sudden and sharp price swings, which can be exacerbated by large or sustained sales by major investors in these markets, a high-profile default by a major Borrower, movements in indices tied to these markets or related securities or investments, or a change in the market's perception of Senior Loans and investments with similar economic characteristics (such as second lien loans and unsecured loans) and Corporate Bonds. At any point in time, an investment in the common shares of the Fund may be worth

less than the original amount invested, even after taking into account distributions paid by the Fund, if any, and the ability of common shareholders to reinvest dividends. The Fund may utilize leverage, which will magnify the Fund's risks and, in turn, the risks to the common shareholders.

Interest Rate Risk

The market value of Corporate Bonds and other fixed-income securities changes in response to interest rate changes and other factors. Interest rate risk is the risk that prices of bonds and other fixed-income securities will increase as interest rates fall and decrease as rates rise. Accordingly, an increase in market interest rates (which are currently considered low by historic standards) may cause a decrease in the price of a debt security and, therefore, a decline in the net asset value of the Fund's common shares. The magnitude of these fluctuations in the market price of bonds and other fixed-income securities is generally greater for those securities with longer maturities. Because Senior Loans with floating or variable rates reset their interest rates only periodically, changes in prevailing interest rates (and particularly sudden and significant changes) can be expected to cause some fluctuations in the net asset value of the Fund's common shares. In addition, Senior Loans or similar loans or securities may allow the Borrower to opt between LIBOR-based interest rates and interest rates based on bank prime rates, which may have an effect on the net asset value of the Fund's common shares.

LIBOR Rate Risk

National and international regulators and law enforcement agencies have conducted investigations into a number of rates or indices that are deemed to be "reference rates." Actions by such regulators and law enforcement agencies may result in changes to the manner in which certain reference rates are determined, their discontinuance, or the establishment of alternative reference rates. In particular, on July 27, 2017, the Chief Executive of the U.K. Financial Conduct Authority (the "FCA"), which regulates LIBOR, announced that the FCA will no longer persuade or compel banks to submit rates for the calculation of LIBOR after 2021. Such announcement indicates that the continuation of LIBOR on the current basis cannot and will not be guaranteed after 2021. It appears highly likely that LIBOR will be discontinued or modified by 2021.

The U.S. Federal Reserve, in conjunction with the Alternative Reference Rates Committee, a steering committee comprised of large U.S. financial institutions, is considering replacing U.S. dollar LIBOR with a new index calculated by short-term repurchase agreements, backed by Treasury securities (the "Secured Overnight Financing Rate," or "SOFR"). The future of LIBOR at this time is uncertain. Potential changes, or uncertainty related to such potential changes, may adversely

Notes to Financial Statements *(continued)*

December 31, 2019

affect the market for LIBOR-based securities, including our portfolio of LIBOR-indexed, floating-rate debt securities, or the cost of our borrowings. In addition, changes or reforms to the determination or supervision of LIBOR may result in a sudden or prolonged increase or decrease in reported LIBOR, which could have an adverse impact on the market for LIBOR-based securities, including the value of the LIBOR-indexed, floating-rate debt securities in our portfolio, or the cost of our borrowings. Additionally, if LIBOR ceases to exist, the Fund may need to renegotiate the credit agreement extending beyond 2021 with our credit facility lenders that utilize LIBOR as a factor in determining the interest rate to replace LIBOR with the new standard that is established.

Liquidity Risk

The Fund may not be able to readily dispose of illiquid securities or loans at prices that approximate those at which the Fund could sell the securities or loans if they were more widely traded and, as a result of that illiquidity, the Fund may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations. Limited liquidity can also affect the market price of securities, thereby adversely affecting the net asset value of the common shares and ability to make dividend distributions. Some Senior Loans are not readily marketable and may be subject to restrictions on resale. Senior Loans generally are not listed on any national securities exchange and no active trading market may exist for the Senior Loans in which the Fund may invest. When a secondary market exists, if at all, the market for some Senior Loans may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. Further, the lack of an established secondary market for illiquid securities may make it more difficult to value such securities, which may negatively affect the price the Fund would receive upon disposition of such securities.

Duration and Maturity Risk

The Fund has no fixed policy regarding portfolio maturity or duration. Holding long duration and long maturity investments will expose the Fund to certain additional risks.

When interest rates rise, certain obligations will be paid off by the Borrower more slowly than anticipated, causing the value of these obligations to fall. Rising interest rates tend to extend the duration of securities, making them more sensitive to changes in interest rates. The value of longer-term securities generally changes more in response to changes in interest rates than shorter-term securities. As a result, in a period of rising interest rates, securities may exhibit additional volatility and may lose value.

When interest rates fall, certain obligations will be paid off by the Borrower more quickly than originally anticipated, and the

Fund may have to invest the proceeds in securities with lower yields. In periods of falling interest rates, the rate of prepayments tends to increase (as does price fluctuation) as Borrowers are motivated to pay off debt and refinance at new lower rates. During such periods, reinvestment of the prepayment proceeds by the Adviser will generally be at lower rates of return than the return on the assets that were prepaid. Prepayment reduces the yield to maturity and the average life of the security.

Special Situations and Stressed Investments Risk

Although investments in debt and equity securities and other obligations of companies that may be in some level of financial or business distress, including companies involved in, or that have recently completed, bankruptcy or other reorganization and liquidation proceedings (“Stressed Issuers”) (such investments, “Special Situation Investments”) may result in significant returns for the Fund, they are speculative and involve a substantial degree of risk. The level of analytical sophistication, both financial and legal, necessary for successful investment in distressed assets is unusually high. Therefore, the Fund will be particularly dependent on the analytical abilities of the Adviser. In any reorganization or liquidation proceeding relating to a company in which the Fund invests, the Fund may lose its entire investment, may be required to accept cash or securities with a value less than the Fund’s original investment and/or may be required to accept payment over an extended period of time. Among the risks inherent in investments in a troubled company is that it may be difficult to obtain information as to the true financial condition of such company. Troubled company investments and other distressed asset-based investments require active monitoring.

The Fund may make investments in Stressed Issuers when the Adviser believes it is reasonably likely that the Stressed Issuer will make an exchange offer or will be the subject to a plan of reorganization pursuant to which the Fund will receive new securities in return for a Special Situation Investment. There can be no assurance, however, that such an exchange offer will be made or that such a plan of reorganization will be adopted. In addition, a significant period of time may pass between the time at which the Fund makes its investment in the Special Situation Investment and the time that any such exchange offer or plan of reorganization is completed, if at all. During this period, it is unlikely that the Fund would receive any interest payments on the Special Situation Investment, the Fund would be subject to significant uncertainty whether the exchange offer or plan of reorganization will be completed and the Fund may be required to bear certain extraordinary expenses to protect and recover its investment. Therefore, to the extent the Fund seeks capital appreciation through investment in Special

Notes to Financial Statements *(continued)*

December 31, 2019

Situation Investments, the Fund's ability to achieve current income for its shareholders may be diminished. The Fund also will be subject to significant uncertainty as to when, in what manner and for what value the obligations evidenced by Special Situation Investments will eventually be satisfied (e.g., through a liquidation of the obligor's assets, an exchange offer or plan of reorganization involving the Special Situation Investments or a payment of some amount in satisfaction of the obligation). Even if an exchange offer is made or plan of reorganization is adopted with respect to Special Situation Investments held by the Fund, there can be no assurance that the securities or other assets received by the Fund in connection with such exchange offer or plan of reorganization will not have a lower value or income potential than may have been anticipated when the investment was made or even no value. Moreover, any securities received by the Fund upon completion of an exchange offer or plan of reorganization may be restricted as to resale. Similarly, if the Fund participates in negotiations with respect to any exchange offer or plan of reorganization with respect to an issuer of Special Situation Investments, the Fund may be restricted from disposing of such securities. To the extent that the Fund becomes involved in such proceedings, the Fund may have a more active participation in the affairs of the issuer than that assumed generally by an investor.

To the extent that the Fund holds interests in a Stressed Issuer that are different (or more senior or junior) than those held by other funds and/or accounts managed by Ares or its affiliates ("Other Accounts"), the Adviser is likely to be presented with decisions involving circumstances where the interests of such Other Accounts may be in conflict with the Fund's interests. Furthermore, it is possible that the Fund's interest may be subordinated or otherwise adversely affected by virtue of such Other Accounts' involvement and actions relating to their investment. In addition, when the Fund and Other Accounts hold investments in the same Stressed Issuer (including in the same level of the capital structure), the Fund may be prohibited by applicable law from participating in restructurings, work-outs, renegotiations or other activities related to its investment in the Stressed Issuer absent an exemption due to the fact that Other Accounts hold investments in the same Stressed Issuer. As a result, the Fund may not be permitted by law to make the same investment decisions as Other Accounts in the same or similar situations even if the Adviser believes it would be in the Fund's best economic interests to do so. Also, the Fund may be prohibited by applicable law from investing in a Stressed Issuer (or an affiliate) that Other Accounts are also investing in or currently invest in even if the Adviser believes it would be in the best economic interests of the Fund to do so. Furthermore, entering

into certain transactions that are not deemed prohibited by law when made may potentially lead to a condition that raises regulatory or legal concerns in the future. This may be the case, for example, with Stressed Issuers who are near default and more likely to enter into restructuring or work-out transactions with their existing debt holders, which may include the Fund and its affiliates. In some cases, to avoid the potential of future prohibited transactions, the Adviser may avoid recommending allocating an investment opportunity to the Fund that it would otherwise recommend, subject to the Adviser's then-current allocation policy and any applicable exemptions.

Below Investment Grade Rating Risk

Debt instruments that are rated below investment grade are often referred to as "high yield" securities or "junk bonds." Below investment grade instruments are rated "Ba1" or lower by Moody's, "BB+" or lower by S&P or "BB+" or lower by Fitch or, if unrated, are judged by the Adviser to be of comparable credit quality. While generally providing greater income and opportunity for gain, below investment grade debt instruments may be subject to greater risks than securities or instruments that have higher credit ratings, including a higher risk of default. The credit rating of an instrument that is rated below investment grade does not necessarily address its market value risk, and ratings may from time to time change, positively or negatively, to reflect developments regarding the Borrower's financial condition. Below investment grade instruments often are considered to be speculative with respect to the capacity of the Borrower to timely repay principal and pay interest or dividends in accordance with the terms of the obligation and may have more credit risk than higher rated securities. Lower grade securities and similar debt instruments may be particularly susceptible to economic downturns. It is likely that a prolonged or deepening economic recession could adversely affect the ability of some Borrowers issuing such debt instruments to repay principal and pay interest on the instrument, increase the incidence of default and severely disrupt the market value of the securities and similar debt instruments.

The secondary market for below investment grade instruments may be less liquid than that for higher rated instruments. Because unrated securities may not have an active trading market or may be difficult to value, the Fund might have difficulty selling them promptly at an acceptable price. To the extent that the Fund invests in unrated securities, the Fund's ability to achieve its investment objectives will be more dependent on the Adviser's credit analysis than would be the case when the Fund invests in rated securities.

Notes to Financial Statements (continued)

December 31, 2019

Under normal market conditions, the Fund will invest in debt instruments rated in the lower rating categories (“Caa1” or lower by Moody’s, “CCC+” or lower by S&P or “CCC+” or lower by Fitch) or unrated and of comparable quality. For these securities, the risks associated with below investment grade instruments are more pronounced. The Fund may incur additional expenses to the extent it is required to seek recovery upon a default in the payment of principal or interest on its portfolio holdings. In any reorganization or liquidation proceeding relating to an investment, the Fund may lose its entire investment or may be required to accept cash or securities with a value substantially less than its original investment.

European Risk

The Fund may invest a portion of its capital in debt securities issued by issuers domiciled in Europe, including issuers domiciled in the United Kingdom (“UK”). Concerns regarding the sovereign debt of various Eurozone countries and proposals for investors to incur substantial write-downs and reductions in the face value of the sovereign debt of certain countries give rise to concerns about sovereign defaults, the possibility that one or more countries might leave the European Union or the Eurozone and various proposals (still under consideration and unclear in material respects) for support of affected countries and the Euro as a currency. The outcome of any such situation cannot be predicted. Sovereign debt defaults and European Union and/or Eurozone exits could have material adverse effects on investments by the Fund in securities of European companies, including but not limited to the availability of credit to support such companies’ financing needs, uncertainty and disruption in relation to financing, customer and supply contracts denominated in Euro and wider economic disruption in markets served by those companies, while austerity and other measures that have been introduced in order to limit or contain these issues may themselves lead to economic contraction and resulting adverse effects for the Fund. A number of the Fund’s securities may be denominated in the Euro. Legal uncertainty about the funding of Euro denominated obligations following any breakup or exits from the Eurozone (particularly in the case of investments in securities of companies in affected countries) could also have material adverse effects on the Fund. The uncertainty in the wake of the UK’s “Brexit” referendum and subsequent political developments could have a negative impact on both the UK economy and the economies of other countries in Europe. The Brexit process also may lead to greater volatility in the global currency and financial markets, which could adversely affect the Fund. In connection with investments in non-US issuers, the Fund may engage in foreign currency exchange transactions but is not required to

hedge its currency exposure. As such, the Fund makes investments that are denominated in British pound sterling or Euros. The Fund’s assets are valued in US dollars and the depreciation of the British pound sterling and/or the Euro in relation to the US dollar in anticipation of Brexit or otherwise adversely affects the Fund’s investments denominated in British pound sterling or Euros that are not fully hedged regardless of the performance of the underlying issuer. Global central banks may maintain historically low interest rates longer than was anticipated prior to the Brexit vote, which could adversely affect the Fund’s income and its level of distributions.

(9) Subsequent Events

The Adviser has evaluated the impact of all subsequent events on the Fund through the date the financial statements were issued and has determined that there were the following subsequent events:

The following common share distributions were declared on January 10, 2020:

Ex-Date: January 21, 2020
Record Date: January 22, 2020
Payable Date: January 31, 2020
Per Share Amount: \$0.1075
Ex-Date: February 20, 2020
Record Date: February 21 22, 2020
Payable Date: February 28, 2020
Per Share Amount: \$0.1075
Ex-Date: March 19, 2020
Record Date: March 20, 2020
Payable Date: March 31, 2020
Per Share Amount: \$0.1075

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of Ares Dynamic Credit Allocation Fund, Inc.

Opinion on the Financial Statements

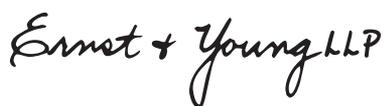

We have audited the accompanying statement of assets and liabilities of Ares Dynamic Credit Allocation Fund, Inc. (the “Fund”), including the schedule of investments, as of December 31, 2019, and the related statements of operations and cash flows for the period from November 1, 2019 to December 31, 2019 and the year ended October 31, 2019, the statements of changes in net assets for the period from November 1, 2019 to December 31, 2019 and each of the two years in the period ended October 31, 2019, the financial highlights for the period from November 1, 2019 to December 31, 2019 and each of the five years in the period ended October 31, 2019 and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund at December 31, 2019, the results of its operations and its cash flows for the period from November 1, 2019 to December 31, 2019 and for the year ended October 31, 2019, the changes in its net assets for the period from November 1, 2019 to December 31, 2019 and for each of the two years ended October 31, 2019 and its financial highlights for the period from November 1, 2019 to December 31, 2019 and for each of the five years in the period ended October 31, 2019, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of the Fund’s internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2019, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Dividend Reinvestment Plan

Unless a shareholder specifically elects to receive distributions in cash, distributions will automatically be reinvested in additional common shares of the Fund. A shareholder may elect to have the cash portion of dividends and distributions distributed in cash. To exercise this option, such shareholder must notify State Street, the plan administrator and the Fund's transfer agent and registrar, in writing or by telephone so that such notice is received by the plan administrator not less than 10 days prior to the record date fixed by the board of directors for the dividend or distribution involved. Participants who hold their common shares through a broker or other nominee and who wish to elect to receive any dividends and other distributions in cash must contact their broker or nominee. The plan administrator will set up an account for shares acquired pursuant to the plan for each shareholder that does not elect to receive distributions in cash (each a "Participant"). The plan administrator may hold each Participant's common shares, together with the other Participant's common shares, in noncertificated form in the plan administrator's name or that of its nominee. The shares are acquired by the plan administrator for a Participant's account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund ("Newly Issued Shares") or (ii) by purchase of outstanding common shares on the open market ("Open-Market Purchases") on the NYSE or elsewhere. If, on the dividend payment date, the net asset value per share of the common shares is equal to or less than the market price per common share on the NYSE plus estimated brokerage commissions (such condition being referred to as "market premium"), the plan administrator will invest the dividend amount in Newly Issued Shares on behalf of the Participant. The number of Newly Issued Shares to be credited to the Participant's account will be determined by dividing the dollar amount of the dividend by the net asset value per share of the common shares on the date the shares are issued, unless the net asset value of the common shares is less than 95% of the then current market price per share on the NYSE, in which case the dollar amount of the dividend will be divided by 95% of the then current market price per common share on the NYSE. If on the dividend payment date the net asset value per share of the common shares is greater than the market price per common share on the NYSE (such condition being referred to as "market discount"), the plan administrator will invest the dividend amount in common shares acquired on behalf of the Participant in Open-Market Purchases.

The plan administrator's service fee, if any, and expenses for administering the plan will be paid for by the Fund. There will be no brokerage charges to shareholders with respect to common shares issued directly by the Fund as a result of dividends or distributions payable either in common shares or in cash. However, each participant will pay a pro-rata share of brokerage commissions incurred with respect to the plan administrator's Open-Market Purchases in connection with the reinvestment of dividends and distributions.

Shareholders who elect to receive their distributions in cash are subject to the same federal, state and local tax consequences as shareholders who reinvest their distributions in additional common shares. A shareholder's basis for determining gain or loss upon the sale of shares acquired due to reinvestment of a distribution will generally be equal to the total dollar amount of the dividend payable to the shareholders. Any shares received due to reinvestment of a dividend will have a new holding period for tax purposes commencing on the day following the day on which the shares are credited to the U.S. shareholder's account.

Participants may terminate their accounts under the dividend reinvestment plan by writing to the plan administrator at State Street Bank and Trust Company, located at One Lincoln Street, Boston, Massachusetts, 02111 or by calling the plan administrator's hotline at (877) 272-8164. Such termination will be effective immediately if the Participant's notice is received by the plan administrator at least 10 days prior to any dividend or distribution record date for the payment of any dividend or distribution by the Fund; otherwise, such termination will be effective only with respect to any subsequent dividend or distribution. Participants who hold their common shares through a broker or other nominee and who wish to terminate their account under the plan may do so by notifying their broker or nominee. The dividend reinvestment plan may be terminated by the Fund upon notice in writing mailed to each Participant at least 30 days prior to any record date for the payment of any dividend or distribution by the Fund. Additional information about the dividend reinvestment plan may be obtained by contacting the plan administrator by mail at One Lincoln Street, Boston, Massachusetts 02111 or by telephone at (877) 272-8164.

Privacy Notice

We are committed to maintaining the privacy of our shareholders and to safeguarding their nonpublic personal information. The following information is provided to help you understand what personal information we collect, how we protect that information and why, in certain cases, we may share information with select other parties.

Generally, we will not receive any non-public personal information about shareholders of the common stock of the Fund, although certain of our shareholders' non-public information may become available to us. The non-public personal information that we may receive falls into the following categories:

- Information we receive from shareholders, whether we receive it orally, in writing or electronically. This includes shareholders' communications to us concerning their investment;
- Information about shareholders' transactions and history with us; or
- Other general information that we may obtain about shareholders, such as demographic and contact information such as address.

We do not disclose any non-public personal information about shareholders, except:

- to our affiliates (such as our investment adviser) and their employees that have a legitimate business need for the information;
- to our service providers (such as our administrator, accountants, attorneys, custodians, transfer agent, underwriter and proxy solicitors) and their employees as is necessary to service shareholder accounts or otherwise provide the applicable service;
- to comply with court orders, subpoenas, lawful discovery requests, or other legal or regulatory requirements; or
- as allowed or required by applicable law or regulation.

When the Fund shares non-public shareholder personal information referred to above, the information is made available for limited business purposes and under controlled circumstances designed to protect our shareholders' privacy. The Fund does not permit use of shareholder information for any non-business or marketing purpose, nor does the Fund permit third parties to rent, sell, trade or otherwise release or disclose information to any other party.

The Fund's service providers, such as their adviser, administrator, and transfer agent, are required to maintain physical, electronic, and procedural safeguards to protect shareholder nonpublic personal information; to prevent unauthorized access or use; and to dispose of such information when it is no longer required.

Personnel of affiliates may access shareholder information only for business purposes. The degree of access is based on the sensitivity of the information and on personnel need for the information to service a shareholder's account or comply with legal requirements.

If a shareholder ceases to be a shareholder, we will adhere to the privacy policies and practices as described above. We may choose to modify our privacy policies at any time. Before we do so, we will notify shareholders and provide a description of our privacy policy.

In the event of a corporate change in control resulting from, for example, a sale to, or merger with, another entity, or in the event of a sale of assets, we reserve the right to transfer your non-public personal information to the new party in control or the party acquiring assets.
